

Our Mission

Last Updated Wednesday, 03 March 2010 20:44

Windswept Web Services, LLC was founded in 2009 to focus on the needs of small businesses and non-profits, groups that are traditionally overlooked by web design firms.

Yet, we feel that it is exactly these businesses and charities that truly need the most help in getting their names out on the web.

We focus on one-on-one interaction with each client, learning the clients needs, likes and wants in order to build a better website and build a better user experience for their customers and donors.
